PROFILE

Software engineer based at 1337 with an eye for clean systems and purposeful design. I approach every project with intention and an obsession with getting it right, drawn to work where precision actually matters and the craft behind every layer shows.

SELECTED PROJECTS

21 — Project Hub

Mar 2026

Real-time collaboration platform for 42 students with team workspaces, live kanban, chat, and multiplayer games.

webserv

Nov 2025

From-scratch HTTP server built in C++ handling requests, responses, CGI, and concurrent connections without any external libraries.

skinnk

Jul 2025

A URL shortener with custom aliases, click tracking, and a clean editorial UI. Full-stack, containerized, production-ready.

Mosaico

Jul 2025

A web-based mosaic personalization and ordering system built for a real tile company. Users design custom layouts from an authentic tile catalogue, colour customization, and order management.
